

# PILLAR PRO TG

REF.NO. 2C39800

Hot-forged light alloy carabiner with an oval shape, triplex gate and elevated workloads. Particularly suitable for recovery and rescue operations, mountaineering, speleology, aid climbing and big wall.

Main features:

- oval shaped for optimal positioning of pulleys and clamps, shaped for better grip during use;
- **elevated workloads: major axis strength 25 kN and minor axis strength 12 kN;**
- improved section in the most used points, for an increased resistance during the contact with the equipment and rope;
- catch-free closure that prevents accidental snagging during use.
